

DevOps ENGINEER

Wave5 is quickly growing organization engaged in Data Analytics, Artificial Intelligence, Machine Learning, and IoT. We help our clients to transform their raw data into useful information and new insights, which is why we are closely following new developments in Microsoft technology.

We carry out this mission on the basis of four important values: growth, craftsmanship, fun, and independency. We believe all our employees should have in equal say in ensuring these values are kept in place. You will be encouraged to share your ideas and views as much as possible.

At Wave5 you will be working for a modern, cutting-edge organization at the forefront of Microsoft innovation and technologies. We strive for excellence and encourage you to grow along with us, in a business sense, but in a personal sense as well.

As DevOps Engineer you will have an important part to play at Wave5. You ensure the successful roll-out and maintenance of our platform and applications. You also ensure that the code is under control and that we can manage our customers' applications with a high level of confidence. Your workload will include working with Cloud Infrastructure, Application Infrastructure, and Data Analytics Infrastructure pipelines. Your skills and knowledge will be put to good use to work on the success of Wave5 as a modern and future oriented organization. For this, you will use the newest technologies that Microsoft has to offer. At Wave5, you will enjoy a lot of freedom, and responsibility, to use your modeling and analytical skills to ensure a satisfied client.

Besides the knowledge and skills you already possess, Wave5 offers you a lot of room to keep on growing. You will learn from our experts, on the job, and extra training. This way, you will keep on improving, and your knowledge will be continuously sharpened.

What we ask:

- The drive and curiosity to keep on learning and growing
- A proactive and self-organizing mindset
- You are collegial and work well in teams
- An attitude focused on our clients
- A passion for technology and the development of Data & AI solutions
- Experience with Pipeline creations (CI/CD)
- Experience with release and product management
- Experience with taking ownership over development environments
- Experience with maintaining production environments
- Experience with Azure DevOps
- Experience with DataOps
- Experience with technologies such as: Powershell, Azure CLI, ARM Template, Biceps, Terraform, and YAML
- It is helpful to have started or finished your Azure Certification

What we offer:

- A culture of growth based on safety and trust in which we are constantly learning and researching, and focus on each other's knowledge is emphasized
- Exciting and challenging assignments and projects in which we will use the newest technologies
- A nice salary supplemented with:
 - A personal budget that can be used for pension or other matters
 - An educational budget that you can use for an education of your choice
 - A mobility budget which can be used for a car, bicycle, public transport subscription, or a combination of the above
 - Laptop and phone
- Digital nomads: it is possible to work from abroad

Certifications you will train for:

- Microsoft Certified: Azure Fundamentals;
- Microsoft Certified: Azure Administrator Associate;
- Microsoft Certified: DevOps Engineer Expert;
