

Solution Architect

Wave5 is a rapidly growing organization engaged in Data Analytics, Artificial Intelligence, Machine Learning and IoT. We help our clients to transform their data into useful information and new, uniform insights, which is why we are closely following new developments in Microsoft technology.

We carry out this mission based on four important values: growth, craftsmanship, fun, and independency. We believe all our employees should have in equal say in ensuring these values are kept in place. You will be encouraged to share your ideas and views as much as possible.

At Wave5 you will be working for a modern, cutting-edge organization at the forefront of Microsoft innovation and technologies. We strive for excellence and encourage you to grow along with us, in a business sense, but in a personal sense as well.

As Solution Architect you will be an important part of our team. Your Architecture Design skills will be put to good use to work on the success of Wave5 as a future oriented organization. You are responsible for the successful design and development of our AI Applications. For this, you will use the newest innovations and technologies that the Microsoft Platform has to offer. At Wave5 you will get a lot of freedom, and responsibility to use your skills to make sure our clients are more than satisfied.

Besides the knowledge and skills you already have, Wave5 offers you a lot of room to keep on growing. You will learn from our experts, on the job, and extra training. This way, you will keep on improving, and your knowledge will be continuously sharpened.

What we ask:

- The drive and curiosity to keep on learning and growing
- A proactive and self-organizing mindset
- You are collegial and work well in teams
- An attitude focused on our clients
- A passion for technology and the development of Data & AI solutions
- Experience with .NET, C#, TypeScript, Python
- Experience with Azure DevOps
- A proven record of building applications
- Experience with development in Azure Cognitive Services
- It is helpful to have a Scrum Master certificate and to have started or finished an Azure certificate

What we offer:

- A culture of growth based on safety and trust in which we are constantly learning and researching, and focus on each other's knowledge is emphasized
- Exciting and challenging assignments and projects for which we will use the newest technologies
- A nice salary supplemented with:
 - A personal budget that can be used for pension or other matters
 - An educational budget that can be used for an education of your choice
 - A mobility budget that can be used for a car, bicycle, public transport subscription or a combination of the above
 - Laptop and phone
- The freedom to choose from where and how you want to work
- Digital nomads: it is even possible to work from abroad
